

## KISS DVD Player DP-450 FAQ

Q: What video codecs are supported by KiSS DP-450 ?

A: All video codecs that comply with the specifications of ISO-MPEG4 – Advanced, Simple Profile, are supported by the DP-450. DivX 4.x and 5.x comply with this standard, except DivX 5.02 features- GMC (Global Motion Compensation) and QP (Quarter Pixel) which are Advanced, Advanced Profile features.

Xvid 2.10 and Sigma's RPM4(RealMagic MPEG4) also complies with the supported standard.

Q: I'd like to know if your DVD player DP 450 is region free and/or macrovision free ?

A: No, most certainly not. KiSS DVD-Players are not without Macrovision protection and are always region locked to a specific region. KiSS Technology A/S

Q: DP-450 is able to play DivX 4.x and 5.x, but what will happen when a new version of DivX is released? Is it possible to upgrade the software to support newer codecs ?

A: If a newer DivX codec is released, e.g. DivX 6.x, DP-450 will be able to play it if the codec is ISO-MPEG4 – Advanced, Simple Profile compliant. A codec needs to be made from the principles and specifications of ISO-MPEG4 Advanced, Simple Profile to function properly on the DP-450.

Q: What recordable media's are supported by KiSS DP-450 ?

A: CD-R (74 min + 80 min), CD-RW (74 min + 80 min), DVD-R , DVD-RW are supported by DP-450. This means that DVD+R and DVD+RW are not supported.

Q: Where can I get more detailed information about the player. I've already downloaded your PDF file, but it doesn't tell much ?

A: You will for now be able to get much more detailed information by reading this FAQ. You can also get extensive information by visiting <http://www.kissdvd.com>

Q: Does your player fully support SVCD movies (mainly subtitles)? What kind of subtitles does it supports in DivX files? Is it upgradable?

A: The initial release of DP-450 will not support any subtitles on either SVCD or DivX. This feature will most likely be implemented in a later software release for the player.

Q: The "Repeat Playback" function - will it allow a DVD, JPEG CD, etc. to repeatedly replay?

A: There are features on the DP-450 which enables Repeat mode on all of the above content.

Q: Is it possible to FF / FR (Fast Forward / Fast Reverse) through DivX films ?

A: No, but we have implemented a timesearch function, which allows you to jump to a specific place in the film.

Q: In JPEG mode can it show the pictures in full screen mode ?

A: Yes, it does that automatically and digital zoom function is also available with JPEG's.

Q: Does DP450 also support Mp3PRO?

A: No, MP3Pro is at this time not supported by DP-450.

Q: How do the discs have to be recorded for the player to play ?

A: All DivX and MP3 content should just be burned as a standard ISO9660 Data CD. (Closed Disc)

Q: Does DP-450 play DivX with MP3 audio?

A: Yes it does.

Q: Does DP-450 play media's with multiple video / audio files ?

A: Yes it does. This also goes for multiple DivX files on DVD-R and DVD-RW. Remember not to mix different kinds of files though. Use only one type of file per disc.

Q: What dimensions does it play? like screens of 350 X 240, 720 X 640, etc ?

A: DP450 plays resolution up to PAL and NTSC standards upto 3 Mbit/s.

Q: Does DP-450 support MP3's with variable bitrate?

A: Yes, VBR MP3 is now supported.

Q: Which video outputs supports progressive scan ?

A: Component Scart (YpbPr) supports Progressive Scan in resolutions up NTSC standard.

Q: Is it possible to upgrade DP-450 software ?

A: Yes, software updates will be released on a regular basis on our website. Updates will contain latest Bug-fixes and possibly extra features.

Q: Does DP-450 have a built-in AC3 decoder ?

A: Yes, for AC3 to stereo downmix

Q: Does DP-450 support ID3 tags ?

A: Yes.

Q: How do I know what codec my films are encoded in.

A: Use the setup button to display the version of DivX the film has been encoded with.

Q: Is it possible to Fast Forward and Fast Reverse MP3 files ?

A: No, but it will be implemented in a later release.

Q: How do I **make** the update CD-R with newer firmware to update my DP-450 ?

A: You need burning software that supports .ISO files. This could be Nero Burning ROM v5.5+ or Easy CD Creator v4.0+. When burning the image please make sure that the option "Disc at Once" is set and ensure that the disc is closed after writing. Please refer to your burning software manual on this matter. Follow the standard guidelines for making an .ISO recording. More help can be found on:

<http://www.roxio.com>

<http://www.nero.com>

Q: Which video file extensions are supported by the player ?

A: .MPG, .MPEG, .AVI, .VOB

Q: Which audio file extensions are supported by the player ?

A: .mp3 .ogg and soon .wav

Q: How to use DivX subtitle?

A: Make sure that the filename is exactly the same for the subtitle file and the movie file.  
Fx. "my home movie.avi" and subtitle file: "my home movie.sub"

Q: Which DivX subtitle formats are supported?

A: Current we support MicroDVD, SubRIP, SubViewer, Sami, SubViewer 2 and formats which is similar to this.

Q: How to make DivX subtitles?

A: KiSS does not provide support on the making of DivX subtitles - This feature is provided free of charge, and users are free to use it but because of the various subtitle formats available and the quite complicated process needed to make them we can not provide support for this.
