

# KiSS DVD Player <sup>DP-330</sup>

KiSS DVD Player is based on the latest technology in the field and will provide you with high quality picture and sound.

It is easy to operate and comes in an innovative design with a specially designed Remote Control.

# Digital Zoom

KiSS DVD player will almost double the video resolution compared to the VHS standard, and it will supply you with much sharper colour and CD audio quality, along with many options for theatrical audio ambience and a multiplicity of sound tracks. The sound tracks include separate foreign language tracks, commentary tracks where directors, producers or actors add their comments as the movie plays along.

**Audio Features 96 kHz/24-bit Audio D/A Converter**  
Maximizes DVD and CD audio performance capability, providing smoother, less digitized transitions and richer sonic texture.

### Fast Forward

With a KiSS DVD player, you can search through the movie twice as fast as with the speed of regular DVDs.

### Remote Control

KiSS DVD Player remote control is ergonomically designed to perfectly fit the human hand for soft and easy operation, you can control all the DVD players function's like; fast forward, pause, next chapter, zoom, single step and all the other advanced features.

### Smooth motion Scan and Slow

This feature provides smooth, jitter-free, slow motion and high-speed scan picture quality in both forward and reverse. You can enjoy the crystal-fine special effects, when you watch sports, movies or your favorite shows.

### KiSS DVD Player - Design

One of the most important things to look for in any player is a clean but detailed front. All you really need to know is where to find the open/close button and to find the play button. KiSS DVD Player is also provided with a few more buttons in case you can not find the remote control.

### Push the play button

KiSS DVD Player will maximize your listening and viewing experience to a much higher level. The digital quality, smooth pictures, surround sound, zoom and still picture will enhance the enjoyment and everything will be available from your armchair simply by using the remote control.

## Zoom x 2

## Dolby Digital® and DTS™ Optical & Coaxial Outputs

When connected to a receiver or amplifier with a Dolby Digital or DTS decoder through either the optical or coaxial digital outputs, you can enjoy the phenomenal experience of sound through five discrete full range channels, whether for stunning sound effects or crystal clear dialogue.

DTS® Compatibility allows the DVD player to pickup and output DTS (Digital Theater System) 5.1 channel audio signals for decoding by DTS-decoding receivers. The sound of DTS is three-dimensional with a wide dynamic range and a minimum of compression artifacts.

## Aspect Ratios

Video can be stored on a DVD in 4:3 format (standard TV shape) or 16:9 (wide screen). KISS DVD Player can be adjusted to give you the picture, which exactly fits your TV set.

- The 16:9 format is "anamorphic," meaning the picture is squeezed horizontally to fit a 4:3 rectangle. DVD players can output video in four different ways:
- full frame (4:3 video for 4:3 display)
- letterbox (16:9 video for 4:3 display)
- pan & scan (16:9 video for 4:3 display)
- wide screen (16:9 video for 16:9 display)

## Zoom in Still & Moving picture

For a new level of viewing experience, KISS DVD Players have built in a zoom function using ASIC technology. Now you can have a closer look at your favorite portion of any still or moving picture.

## Component Video Outputs

Provides the highest level of video signal transfer quality available today, when connected to televisions equipped with compatible inputs. By dividing the video signal into component elements, component video outputs deliver a remarkable improvement in picture detail at maximum resolution, with unmatched colour purity and edge detail.

## Bookmark

KISS DVD Player will remember the positions (up to 3) where you want to start playback next time. You can jump to the position saved easily by selecting the position in the Bookmark menu.
